Product Picture	Product Name	Product Code	Description
	Dual control household sticker smart	Sofia016	1 Dual control function: supports dual control of mobile phone APP + remote control, flexible and convenient. 2 Smart linkage: compatible with mainstream smart home platforms (such as Tmall Genie, Xiao Ai), voice control. 3 Wireless installation: no wiring required, just stick it on and use it, suitable for renting or refitting. 4 Remote control: switch home appliances through APP anytime and anywhere, and check away from home more worry-free. 5 Timing scene: supports timing switch/countdown, energy saving and power saving. 6 Strong compatibility: adapt to common electrical appliances such as lamps and fans (power ≤1000W). 7 Small and beautiful: simple design, does not take up space.
	Zigbee temperature and humidity sen	Sofia017	1 Accurate monitoring: high-precision sensors detect temperature and humidity changes in real time. 2 Low power consumption and endurance: Zigbee protocol saves power and has a long battery life (usually 1-2 years). 3 Intelligent linkage: connect to smart home systems (such as Home Assistant, Mijia) to trigger automation scenarios (such as linkage with air conditioners/humidifiers). 4 Wireless and compact: no wiring requirements, free placement or pasting installation. 5 Stable and reliable: Zigbee self-organizing network, strong signal, anti-interference. 6 Remote viewing: real-time monitoring of historical data through APP, support for abnormal reminders. 7 Strong compatibility: compatible with multiple brands of Zigbee gateways (such as Xiaomi, Aqara, Philips Hue).
	LCD screen temperature and humidit	Sofia018	1 High-definition LCD screen: white backlight, real-time and clear display of temperature and humidity data. 2 Accurate monitoring: high-precision sensors, quick response to environmental changes. 3 Zigbee 3.0: low power consumption, long battery life, stable access to smart home systems (such as Home Assistant, Mijia). 4 Intelligent linkage: support automation scenes, linkage with air conditioners, humidifiers and other equipment. 5 Wireless and portable: small and light, magnetic/sticky dual-purpose design, flexible installation. 6 Historical data: view temperature and humidity curves through the APP to grasp environmental trends. 7 Ultra-long battery life: CR2450 battery powered, durable.
	Zigbee human presence sensor	Sofia019	1 Millimeter-wave radar detection: Accurately sense the presence of static/dynamic human bodies, without missed detection or false alarms. 2 Intelligent linkage scenarios: Link lighting, air conditioning and other equipment to turn on when people come and turn off when people leave. 3 Zigbee 3.0 protocol: Low power consumption and long battery life, stable access to platforms such as Mijia and Home Assistant. 4 Multiple installation methods: Support wall-mounted/ceiling/desktop placement, flexible to adapt to different scenarios. 5 Light intensity monitoring: Built-in photosensor, intelligent adjustment of light brightness. 6 Super long battery life: Replaceable CR2450 battery, long-lasting and durable. 7 White simple design: Small and beautiful, easily integrated into the home environment.
	Microwave radar module	Sofia020	1 High-precision detection: microwave radar sensing, accurate detection of dynamic/static human presence, strong anti-interference. 2 Non-contact sensing: penetrating non-metallic materials (such as glass, plastic), concealed installation is more flexible. 3 Stable and low power consumption: 24-hour continuous monitoring, low power consumption, suitable for long-term use. 4 Strong environmental adaptability: not affected by temperature, light, dust, and can work reliably in complex scenes. 5 Industrial-grade durability: moisture-proof and shock-proof design, long service life. 6 Plug and play: standard interface (such as I²C/UART), rapid integration and development
	zigbee motion sensor	Sofia021	1 Intelligent detection: accurately sense human movement, support intelligent linkage lighting, security and other equipment 2 Zigbee 3.0: low power consumption and long battery life, stable connection to mainstream smart home platforms 3 Wireless installation: white simple design, can be pasted or hung on the wall, integrated into the home environment 4 Light sensing: built-in light sensor, intelligent judgment of day and night mode 5 Ultra-long standby: CR2450 battery powered, up to 2 years of battery life 6 IP20 protection: suitable for indoor use, bedroom/corridor/entrance
	Zigbee door and window sensor	Sofia022	1 Smart security: real-time monitoring of door and window switch status, instant push alerts for abnormal opening 2 Zigbee 3.0: low-power stable connection, compatible with smart platforms such as Mijia/Home Assistant 3 Wireless installation: magnetic design, easy to stick with 3M glue, no wiring required 4 Ultra-long battery life: button battery powered, can be used for 1-2 years 5 Smart linkage: linkage with lights/cameras and other devices to realize scenes such as opening the door and lighting 6 Compact and invisible: white simple body, only 1.5cm thick
	Water Sensor	Sofia023	1 Intelligent flood monitoring: real-time detection of water leakage, timely push alarm, and prevent property loss 2 Zigbee 3.0: low power consumption and long battery life, stable connection to smart home systems (such as Mijia/Home Assistant) 3 Wireless installation: compact body, can be attached/placed, and flexibly arranged in areas prone to water leakage 4 Dual detection: high-sensitivity probe + bottom monitoring hole, all-round leak prevention 5 Super long battery life: CR2032 battery powered, durable 6 Intelligent linkage: can be linked to valves/alarms to automatically shut off the water source
	Smart smoke alarm	Sofia024	1 Real-time monitoring: 24-hour intelligent detection of smoke concentration, early detection of fire hazards 2 High-decibel alarm: buzzer alarm above 85dB, local + APP remote dual reminder 3 Intelligent linkage: support linkage with intelligent valves/cameras, automatic shutdown and power off in emergency 4 Low false alarm design: photoelectric sensor, effectively distinguishing between oil smoke/steam and real fire 5 Dual power supply mode: replaceable battery (5 years of battery life) or Type-C power supply, power outage without stopping 6 Self-test function: one-click test of device status to ensure reliable operation at all times
	Smart camera detector	Sofia025	1 Accurate detection: quickly identify hidden cameras (supports infrared/radio frequency/magnetic detection) 2 Portable design: small and light, carry with you, a must-have for travel and renting 3 One-click scanning: simple operation, real-time alarm, privacy protection 4 Applicable in multiple scenarios: hotels, locker rooms, Airbnb and other privacy-sensitive areas 5 No fear of interference: effectively filter daily signal interference such as mobile phones/WiFi 6 Long-lasting battery life: Type-C charging, long-lasting use
	Tuya Smart Electric Curtain Track	Sofia026	1 Intelligent control: supports remote control via mobile phone APP, voice assistant (such as Alexa/Google Assistant), and timer switch. 2 Silent motor: ultra-low noise design, quiet operation without disturbing others. 3 Strong load-bearing capacity: high-load design, suitable for heavy curtains, smooth operation. 4 DIY flexible installation: multiple track lengths are optional, no professional tools are required, easy DIY. 5 Multi-scene mode: supports intelligent scene linkage such as sunrise on/sunset off. 6 Power-off hand pull: manual operation is possible during power outages without affecting use. 7 Strong compatibility: connected to the Tuya ecosystem, can be linked with other smart devices.
	Gas Alarm WiFi Version - Support Ho	Sofia027	1 Hongmeng Intelligent Connection: Seamless access to Huawei Hongmeng Ecosystem, remote monitoring via mobile APP, and intelligent linkage. 2 Accurate detection: High-sensitivity sensor, real-time monitoring of gas leaks, and timely alarm. 3 Multiple alarms: local sound and light alarm + APP push reminder, double protection. 4 WiFi direct connection: no gateway required, independent networking, simpler installation. 5 Self-check function: regular automatic detection of device status to ensure reliable operation. 6 Ultra-long battery life: low power consumption design, durable battery, no need for frequent replacement.
	4-point smart water valve	Sofia028	1 Hongmeng Intelligent Connection: One-click access to Huawei Smart Life, APP remote control/timer switch, smart scene linkage. 2 Anti-leakage protection: Real-time monitoring of water pressure abnormalities, automatic valve closing, to prevent pipe burst and leakage. 3 4-point universal: Adapt to common household water pipe diameters, easy to install. 4 Low power consumption and long battery life: Built-in large-capacity battery, durable, no frequent charging. 5 Intelligent linkage: Can be linked to water immersion sensors, smart speakers, etc. to achieve automatic protection. 6 Manual priority: In case of emergency, you can directly switch manually to ensure water safety.
	Tuya Smart Speaker	Sofia029	1 Whole-house interconnection - supports access to more than 1,000 smart devices, voice control of home appliances, and creates a smart home hub. 2 Dual-mode sound effects - high-definition sound quality + surging bass, one-click switching between music/voice mode to meet audio-visual entertainment needs. 3 AI ultra-fast response - 0.5-second feedback on localized commands, offline voice control, and can be used even when disconnected from the Internet. 4 Dual-platform compatibility - Tuya/Tmall dual-ecological support, seamless linkage across brand devices. 5 Child-friendly - built-in educational content, voiceprint recognition protection, and one-click activation of parent mode.
	Tuya Smart Burglar Alarm	Sofia030	1 Multiple protections - door and window magnets + human body induction + high-decibel alarm, triple anti-theft protection to protect family safety. 2 Intelligent linkage - linkage with cameras/lights and other devices, abnormal triggers automatically record and push alarms. 3 Ultra-long battery life - low power design, 180 days of use on a single charge, no frequent maintenance. 4 Remote deployment - APP remote control, one-click protection when leaving home, real-time alarm notification. 5 Strong compatibility - support platforms such as Tuya/Google Home/Alexa, easy integration into smart home.
