

Product Picture	Product Name	Product Code	Description
	USB Docking Station 3.0 Hub Multi-Port	Sofia046	1 High-speed transmission - USB 3.0 interface, supports 5Gbps transmission speed, file transfer in seconds, efficient office. 2 Multi-port expansion - 1 to 4 interfaces (USB+Type-C, etc.), easily connect mouse, keyboard, USB flash drive and other devices to solve the problem of insufficient laptop interfaces. 3 Plug and play - driver-free installation, compatible with Windows, Mac, Linux and other systems, plug and play, convenient and fast. 4 Type-C support - compatible with the latest laptops, mobile phones and tablets, with strong scalability. 5 Stable power supply - built-in overcurrent protection to avoid short-circuit damage to the device, safer to use. 6 Portable design - small and light, carry it with you on business trips and office work to improve work efficiency. Applicable people: business people, designers, programmers, students and other users who need to connect multiple devices.
	Wireless QR code handheld scanner	Sofia047	1 Wireless and portable - Bluetooth/2.4G wireless connection, free from the constraints of wires, flexible mobile scanning, suitable for warehouses, retail, logistics and other scenarios. 2 Fast identification - high-sensitivity decoding engine, supports one-dimensional/two-dimensional barcodes (QR, PDF417, etc.), scans in seconds, and improves work efficiency. 3 Ultra-long battery life - built-in rechargeable battery, low power design, durable, meet all-weather use needs. 4 Type-C support - compatible with the latest laptops, mobile phones and tablets, with strong scalability. 5 Ergonomic design - light and comfortable to hold, comfortable and non-slip, no fatigue after long-term use. 6 Large-capacity storage - some models support offline storage, scanned data can be temporarily stored and then transferred in batches, and can work even when disconnected from the network.
	Wireless remote control switch 220v	Sofia048	1 Strong Signal & Long Range – Stable RF/Wi-Fi/Bluetooth connection, working up to 100-500m (depending on model), ideal for large homes, warehouses, or outdoor use. 2 High Power Capacity – Supports 220V/10A+ loads, compatible with lights, fans, motors, and other high-power appliances. 3 Wireless & Remote Control – No wiring needed, control devices from a distance via remote, smartphone (Wi-Fi/App), or voice assistants (Alexa/Google Home). 4 Safe & Reliable – Overload & short-circuit protection, fire-resistant materials, and secure signal encryption for worry-free use.
	Car USB Bluetooth Receiver	Sofia049	Wireless music freedom Turn old car audio into Bluetooth system in seconds, support wireless playback of mobile music/navigation/calls, and say goodbye to cumbersome AUX cables. 2 Plug and play USB power supply (cigarette lighter or car USB port), driver-free installation, compatible with 99% of car models, and complete connection in 5 seconds. 3 High-definition sound quality transmission Built-in CSR Bluetooth chip, support A2DP/AVRCP protocol, CD-level lossless sound quality, no noise or lag. 4 Dual device connection Can store 2 mobile phones at the same time, and switch freely while driving (such as private mobile phone + work phone). 5 Intelligent call noise reduction Built-in microphone + CVC noise reduction algorithm, clear calls without echo, safer driving communication.
	UHF500-900MHz Wireless Microphone	Sofia050	1 Ultra-wide frequency band - compatible with 500-900MHz, suitable for mainstream microphone brands, strong anti-interference. 2 High gain (3-8dB) - long-distance stable transmission, covering 100-300 meters, good penetration. 3 Low-loss wire - imported coaxial cable, signal attenuation <0.3dB/meter, no distortion over long distances. 4 Strong and durable - aviation aluminum + IP65 protection, high and low temperature resistance, gold-plated interface anti-oxidation. 5 Intelligent diversity reception (optional) - dual antennas automatically switch to prevent frequency interruption. 6 Flexible installation - magnetic suction/bracket hole, quick fixation, concealed design without exposure. 7 International certification - FCC/CE/RoHS, safety and compliance.
	WiFi Signal Amplifier CF-XR181	Sofia051	1 Dual-band extension - synchronously amplifies 2.4GHz & 5GHz dual-band signals, compatible with all routers. 2 High-speed transmission - 5G band rate is up to 867Mbps, HD video/game 0 lag. 3 Wide coverage - 4 high-gain antennas, covering dead spots, wall penetration ability increased by 50%. 4 One-key relay - no need for complex settings, press the WPS button to connect in seconds, support mobile phone APP management. 5 Stable heat dissipation - built-in heat sink, long-term operation without speed reduction, strong durability. 6 Applicable to multiple scenarios - the first choice for WiFi expansion in villas/duplexes/offices. In one sentence: Dual-band wall penetration king, a simple press, full grid in the whole house!
	Wireless network card wifi receiver 7	Sofia052	1 Dual-band high speed - 2.4GHz/5GHz dual-band, 5G band rate up to 433Mbps, stable and low latency. 2 Driver-free installation - plug and play (Windows/Mac), no CD required, one-click networking. 3 Super strong reception - external high-gain antenna, strong signal penetration, away from lag and disconnection. 4 Compact and portable - mini USB design, universal for laptops/desktops, easy to carry. 5 Safe and energy-saving - support WPA3 encryption, smart power saving mode, no heat after long-term use. Applicable scenarios: home office, online classes, game live broadcast, old computer upgrade WiFi. In a word: driver-free dual-band small steel cannon, full network speed without disconnection!
	Driver-free USB wireless network card	Sofia053	1 Plug and Play - no need to install drivers, automatically identify when plugged into the computer, and connect to the Internet in 3 seconds. 2 Dual-band high speed - supports 2.4GHz/5GHz dual-band, 5G band rate up to 433Mbps. 3 Stable and no disconnection - built-in high-gain antenna, strong signal, excellent wall penetration performance. 4 Widely compatible - Windows/Mac/Linux multi-system support, desktop/laptop universal. 5 Mini and portable - small U disk design, carry with you, plug and play super convenient. Plug and use, dual-band high-speed stable connection
	USB-RS232 cable with 9-female to D	Sofia054	1 Plug and play - driver-free installation (automatic identification by mainstream systems), quick connection to old devices. 2 Industrial-grade stability - built-in chip to prevent interference, no packet loss in data transmission, compatible with PLC/industrial control equipment. 3 Dual interface coverage - USB to RS232 (9-pin female port) + 9 female to 25 male port included, compatible with 99% serial port devices. 4 High-speed transmission - supports 115200bps baud rate, no delay in debugging instruments/CNC machine tools. 5 Durable design - gold-plated interface is anti-oxidation, thickened wire is anti-breakage, and can be used in industrial scenarios for a long time. Applicable scenarios: upgrade of old serial port devices such as industrial control machine tools, server debugging, medical equipment, POS machines, etc. Old equipment savior, industrial-grade stability, one-click connection!
	RS232/485 to Ethernet port module	Sofia055	1 Dual serial ports to Ethernet - supports RS232+RS485 to RJ45 at the same time, easily accessing industrial networks. 2 Industrial-grade stability - lightning protection/anti-interference design, -40℃~85℃ wide temperature working, 7×24 hours operation. 3 Modbus gateway - built-in TCP/RTU protocol conversion, seamless connection to PLC/SCADA system. 4 Zero-delay transmission - 10/100M adaptive network port, baud rate up to 921.6Kbps, no data packet loss. 5 Flexible configuration - one-click setting of IP/port on web page/WEB, supporting virtual serial port and transparent transmission mode. Applicable scenarios: Industrial Internet of Things (IIoT) upgrades such as smart factories, power monitoring, building automation, etc. Industrial protocols are converted to Ethernet in seconds, and they are as stable as steel in harsh environments!
	Gigabit switch router splitter	Sofia056	1 High-speed transmission - 5/8/16/24 ports optional, Gigabit/2.5G ports to meet large bandwidth requirements. 2 Intelligent diversion - automatically optimize network traffic, games/videos/downloads multi-task without lag. 3 Plug and play - no configuration required, power on and ready to use, easy to expand the LAN. 4 Stable and durable - metal shell with good heat dissipation, 7×24 hours of long-term operation, enterprise-level performance. 5 Silent and energy-saving - fanless design, low power consumption, zero noise for office/home use. Applicable scenarios: networking of small and medium-sized enterprises, multi-device connection in e-sports rooms, and expansion of home NAS. Multi-port Gigabit high-speed interconnection, intelligent diversion is as stable as a rock!
	USB splitter one to four port converter	Sofia057	1 High-speed transmission - USB 3.0/3.1 interface, 5Gbps rate, file transfer in seconds without lag. 2 Four-port expansion - one-click connection of multiple devices such as keyboard and mouse/U disk/mobile hard disk to solve the problem of insufficient interfaces. 3 Plug and play - driver-free installation, compatible with mainstream systems such as Windows/macOS/Linux. 4 Stable power supply - with independent power supply port (optional), supports high-power devices such as external hard disk. 5 Compact and portable - simple design, thin and light body, carry it with you without taking up space. Applicable scenarios: office multi-device connection, notebook interface expansion, external storage transmission. Four-port high-speed expansion, plug and play, double office efficiency!
	RS485 communication module 433	Sofia058	1 Industrial-grade stability - wide temperature design, lightning protection and anti-interference, adaptable to harsh environments. 2 433MHz long-distance transmission - up to 3km in open areas, breaking through wiring limitations. 3 Guide rail installation - quickly integrated into the electrical cabinet, saving space and construction costs. 4 Transparent transmission - plug and play, no need to modify the user agreement, compatible with mainstream PLC/instruments. 5 Dual-mode power supply (DC/terminal) - flexible adaptation to 12-24V, worry-free docking in industrial scenarios
	Power communication module module	Sofia059	1 High-precision measurement - supports 100A high current detection, open-close CT installation without wire removal, convenient and safe. 2 Full parameter monitoring - voltage/current/power/electricity/frequency/power factor integrated in one machine. 3 TTL serial communication - directly connect to microcontroller (such as Arduino/STM32), development and debugging are simpler. 4 Pin header design - compact PCB layout, fast plug-in and pull-out, suitable for embedded integration. 5 Wide voltage power supply (AC/DC 80-260V) - adapt to a variety of power usage scenarios, industrial-grade stability.
	Multifunctional 485 power meter	Sofia060	1 All-electric parameter measurement - Accurately monitor voltage, current, power, electric energy, frequency, power factor, etc., one machine for multiple uses. 2 RS485 communication - Support Modbus-RTU protocol, easily access PLC/SCADA/energy management system. 3 High-precision display - 0.5 level accuracy, optional LED/LCD screen, intuitive data visualization. 4 Industrial-grade reliability - Wide temperature design (-25℃~+60℃), strong anti-interference, adaptable to harsh environments. 5 Flexible installation - Rail-type or panel-type fixing, compatible with standard distribution cabinets, convenient construction.
